

## Backup and Disaster Recovery

### PROTECT SENSITIVE DATA WITH RESILIENCE

Newtek Backup and Disaster Recovery services deliver the peace of mind you need, knowing your data is protected, available and easy to recover – no matter what the unexpected may bring. Our fully-managed solution delivers cost-effective, worry-free protection to secure data from natural disasters, ransomware attacks, unplanned downtime or other system failures. As a result, you can ensure business availability with the ability to seamlessly recover from anything that might come your way.

#### **Secure Your Data with Confidence**

Newtek delivers world-class backup and disaster recovery (DR) services so you know your data is securely and compliantly protected and stored.

#### **Avoid the High Cost of Building DR Infrastructure**

Building physical backup and disaster recovery infrastructure is costly. Release your budget while ensuring data availability resilience.

#### **Colocation for Data Availability and Continuity**

Newtek uses compliant data-center colocation to ensure your stored data is always available, protected and secure—regardless of circumstance.

### ASSURED DATA RECOVERY FOR A PRODUCTIVE BUSINESS

Newtek Backup and Disaster Recovery services are fully secure and managed for the cost-effective data protection you need to ensure availability and business resilience. Don't rely on a unpredictable mix of point products or build your own high-cost backup infrastructure. Our compliant and high-performance backup and DR services protect your data for a fixed monthly fee, making budgeting easy, scalability simple and data available when and where you need it.

## Recovery Ready

In the event of a disaster or unexpected failure, Newtek's cost-effective offsite Backup and Disaster Recovery services make recovery easy. Get data restored faster, and without error, without the expense of managing and maintaining your own redundant datacenter. Our experts will guide you through your protection journey every step of the way.

**GUIDED EXPERTS, 24/7**

## Compliant Datacenters, Monitored 24/7

Newtek will retain your data in our compliant and secure datacenters, monitored by our expert team 24/7. That means we're relentlessly watching your data so it remains safe and secure. Our datacenter meets industry standard compliance requirements for SOX, HIPAA, ISO and more. And for organizations already invested in the cloud, we offer the choice of using our managed private, public or hybrid cloud options.

**CLOUD CHOICE**

## Backups with Seamless Transparency

Newtek Backup and Disaster Recovery services protect your data with seamless ease. Backups run securely in the background. This eliminates the risk of downtime due to shrinking backup windows and doesn't tie up system availability. That means you remain productive, while your data is securely protected.

**AUTOMATED PROTECTION**

## DATA PROTECTION – FOR ANY BUSINESS

### Small Business

Newtek backup and DR services give small businesses the data protection and retention they need without a high up front investment or heavy resource drain.

### Mid-Size Business

Newtek delivers backup and DR scalability to support the growing business with seamless ease and agility while ensuring data is easy to access and recover.

### Enterprise

Newtek delivers sophisticated protection strategies for enterprises of all sizes. Multiple datacenter locations are available for the distributed business to simplify data recovery.

Newtek Technology Solutions, Inc. ("NTS"), a portfolio company of Newtek Business Services Corp. [Nasdaq: NEWT], provides a complete range of IT managed services, secure private cloud hosting, backup and disaster recovery, and full web ecommerce solutions. NTS has specialized in helping businesses leverage technology to drive innovation for over three decades.
